PROFESSIONAL SUMMARY

Motivated engineering graduate with a strong foundation in **Core Java** and hands-on experience with frameworks such as **Spring, Spring Boot, Spring MVC**, and **Hibernate**. Familiar with building backend applications and integrating APIs, along with a working knowledge of web technologies including **HTML, CSS**, and **JavaScript**. Eager to contribute to scalable applications while continuously enhancing technical skills.

EDUCATION

Nagpur University

Bachelor of Technology in Electronics and Communication

CGPA: 6.97/10

July 2025

EXPERIENCE

Greateway Software Pvt Ltd

Java Developer Intern

Sep 2025 – Feb 2026

- Developed and maintained backend components using Core Java and the Spring ecosystem (**Spring, Spring MVC, Spring Boot**), ensuring scalable and well-structured architecture.
- Implemented database operations using Hibernate ORM, including entity mapping, query optimization, and efficient data persistence.
- Designed and integrated **RESTful APIs** to enable seamless communication between frontend and backend systems.
- Contributed to frontend development using HTML and CSS, ensuring smooth integration with backend services and consistent UI.

PROJECTS

Adaptive Traffic Signal System | *Raspberry Pi, Ultrasonic Sensors, Python, Embedded Systems*

- Built an adaptive traffic signal system to optimize signal timings based on real-time traffic density.
- Integrated sensors with microcontroller logic to detect vehicle presence and lane congestion.
- Developed decision algorithms to prioritize high-traffic lanes and improve flow efficiency.
- Reduced waiting time compared to traditional fixed-timing traffic signal systems.
- Implemented end-to-end system including hardware interfacing and control logic.
- Gained hands-on experience in embedded systems, automation, and real-world problem solving.

Summarisation Extension | *Spring Boot, Gemini API, HTML, CSS, JavaScript, Postman*

- Developed a **Spring Boot**-based research assistant integrating the Gemini API for dynamic query responses.
- Built a responsive browser interface using **HTML, CSS, and JavaScript** for seamless user interaction.
- Tested and validated REST APIs using Postman to ensure accurate requests and reliable backend communication.
- Implemented core features including query handling, API integration, and dynamic content rendering.
- Maintained clean, modular code structure following best practices for scalability and readability.
- Gained hands-on experience in full-stack development, API integration, and real-time data processing.

TECHNICAL SKILLS

Programming Languages: Java, Python (Basic)

Frameworks & Libraries: Spring, Spring Boot, Spring MVC, Hibernate

Tools & IDEs: Eclipse, IntelliJ, GitHub, PostMan, Maven

Databases: MySQL

Web Technologies: HTML, CSS, JavaScript (Basic), React (Basics)

ACHIEVEMENTS & EXTRA-CURRICULAR ACTIVITIES

- Secured First Prize for the Final Year Engineering Project titled “**Adaptive Traffic Signal System**” at the college project competition.
- Successfully pitched the **Adaptive Traffic Signal System** project idea at the **MSME** innovation and entrepreneurship platform.
- Participated in a **VHDL Workshop**, gaining practical exposure to hardware description language concepts and digital system design.

PERSONAL INFORMATION

- **Name:** Madhav Ambulkar
- **Date of Birth:** 03/07/2003
- **Marital Status:** Single
- **Languages Known:** English, Marathi, Hindi
- **Nationality:** Indian
