Summary

Enthusiastic Java Full Stack Developer with a strong foundation in **Core Java** and **object-oriented programming**. Hands-on experience in building **RESTful APIs** using **Spring Boot**, **Hibernate (JPA)**, and **MySQL**, along with developing responsive user interfaces using **React.js**, **HTML**, **CSS**, and **JavaScript**. Familiar with implementing **authentication and security** using **Spring Security** and **JWT**. Eager to learn, adapt quickly, and contribute effectively in a team-oriented environment.

Technical Skills

Programming Languages: Java (Core Java 8), JavaScript, SQL

Backend Development: Spring Boot, Spring MVC, Hibernate (JPA), JDBC, RESTful APIs, API Design

Security & API: Spring Security, JWT Authentication, Swagger, Postman

Messaging & Architecture: RabbitMQ, DTO Design Pattern, MVC Architecture

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Databases: MySQL

Tools & Build: Git, GitHub, Maven, IntelliJ IDEA, VS Code

Logging & Validation: SLF4J, Server-side Validation, Global & Custom Exception Handling

Cloud: AWS (EC2, S3 - Basics)

Core Concepts: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, Multithreading

Experience

Greateway Software Pvt. Ltd. (IT Services Company), Pune

Nov 2025 – April 2026

Java Full Stack Developer Intern

Pune, Maharashtra

- Developed and maintained **full stack web applications** using **Java**, **Spring Boot**, **React.js**, and **REST APIs**, ensuring application stability and scalability.
- Designed and implemented **secure RESTful APIs** with **Spring Boot**, incorporating **JWT authentication** and **role-based authorization** using **Spring Security**.
- Applied **Hibernate (JPA)** and **JDBC** for efficient **database interaction**, along with **MySQL** for data modeling, query optimization, and persistence.
- Implemented **CRUD operations**, **server-side validation**, and **global exception handling** to build robust and reliable backend services.
- Utilized **Maven** for project build management and **Git/GitHub** for version control and collaborative development.
- Performed **debugging**, **log analysis (SLF4J)**, and troubleshooting to identify and resolve application issues, improving system performance.
- Collaborated in an **Agile environment**, contributing to feature development, API integration, and overall system enhancement.

Airry Rides

Aug 2023 – Mar 2024

Front-End Developer

Indore, M.P.

- Developed **responsive** and **cross-platform mobile applications** using **React Native**, improving user experience and app performance.
- Integrated **REST APIs** with **MongoDB backend** hosted on **AWS (EC2)**, enabling **real-time data updates** and scalable architecture.
- Implemented key features such as **location-based search**, **navigation**, and **scheduling systems**, enhancing platform usability.
- Converted **Figma designs** into reusable UI components using **React.js** and **Tailwind CSS**, ensuring responsive design across devices.
- Optimized performance by reducing **unnecessary re-renders**, improving component efficiency and load time.
- Collaborated with backend teams for **API integration**, resolving data inconsistencies and improving system reliability.
- Maintained **clean code practices** and built reusable components, ensuring scalability and maintainability.

Projects

Personal Loan Application | *Spring Boot, React.js, Tailwind CSS, MySQL, REST APIs*

- Developed a **full-stack application** to manage loan lifecycle, including application processing, approval workflows, and repayment tracking.
- Designed and implemented **RESTful APIs** using **Spring Boot** with **JWT-based authentication** and **Spring Security**.
- Integrated **MySQL** for managing loan records, repayment schedules, and transaction data.
- Built a responsive frontend using **React.js** and **Tailwind CSS** for seamless user and admin interaction.
- Developed core features such as **EMI calculation**, **loan eligibility checks**, and **status tracking**.
- Implemented **validation**, **error handling**, and **logging** to ensure secure and reliable backend services.

Flood Risk Assessment System | *React.js, Next.js, FastAPI, Google Gemini, Tailwind CSS*

- Developed an **AI-powered web application** to assess flood risk from terrain images using automated analysis.
- Integrated **Google Gemini** with a **FastAPI backend**, implementing fallback logic for improved reliability.
- Implemented **image validation**, risk analysis, and structured output including elevation, proximity to water, and recommendations.
- Designed a responsive UI using **Next.js**, **TypeScript**, and **Tailwind CSS**.
- Tested APIs using **Postman** and handled edge cases to ensure application reliability.

Certifications

Technology Software Development Job Simulation – Forage [\[Link\]](#)

Java – OneRoadmap [\[Link\]](#)

Python Programming – Universal Informatics

Extracurricular

Participant – **ICICRTC** (International Conference on Innovative Computing and Research Trends in Computer Science), April 2023

Member – **Google Developer Student Clubs (GDSC)**, Chameli Devi Group of Institutions, Indore
